

BIPOL

PROGX⁺ Micro

The BIPOL PRO GX+ Micro is a high-performance portable videoscope specifically designed for industrial inspections where extremely small access diameters are required.

Equipped with ultra-thin flexible probes available in Ø 0.78 mm and Ø 1.0 mm, with a working length of 1 meter, the system provides access to extremely narrow bores, channels and cavities that cannot be inspected with conventional videoscopes.

The miniature 160,000-pixel camera provides detailed real-time imaging for reliable visual inspection. Due to their ultra-small diameter, the probes are non-articulating and feature a 0° forward-viewing camera.

Images and videos are displayed on the 5" HD touchscreen, providing clear visualization and intuitive operation throughout the inspection process.

● Ultra-Slim. Fully Featured

COMPLETE INTERFACE

- Anti glare feature
- Noise reduction
- Negative mode
- Digital zoom 10x
- 2D measurement
- Report edition

TEXT ANNOTATION

- 150 characters
- Rename images & videos

EASY ACCESS TO MENU

PHOTOS/VIDEOS

160.000 px
(400x400px)
